

Virtual Distributor Sites Deliver !

Product Configuration/CAD drawing in a "CLICK"

The Internet is finally starting to deliver the goods. No fuss, rules based, product configuration, presented with a clean intuitive GUI. Camozzi Pneumatics unveils it's state of the art product configurator. Operating in real time from the Camozzi Internet, web site, <http://www.camozzi-usa.com> This on-line tool gives those requiring engineered configured products a fast method for building part numbers and then generating dimensioned 2D, 3D, solid model product drawings and CAD files. The drawings are parametrically generated in the TechnADRAW CAD module providing the user with a full screen view . The dimensioned drawings can be printed out on a plot sheet as a record and saved directly to your computer in a number of popular CAD formats. No, lengthy downloads, no waiting for e-mail delivery. This real time system runs like a stand alone software application on your PC.

Camozzi, Click and Go, configuration, builds product model numbers.

"Easy as 1, 2, 3"

www.camozzi-usa.com

- 1, Configure the required product, building the model number.
- 2, Click on Draw Part, generate a full screen product drawing.
- 3, Click the RFQ button, an electronic request for quote is automatically filled in and generated. Confirming product CAD files are attached. Click Send.

"VeriSign

ensures user system security"

Security an issue? The site is VeriSign certified. Any information exchanged from the site is clean and confidential. Camozzi makes on-line configuration, and CAD drawing access, FAST and SAFE.

Users that require price, availability and delivery information can click onto the RFQ button. The electronic Request for Quote is automatically filled in and confirming CAD drawing files are attached. Add additional information if you require and click send. Your RFQ will be answered within minutes by Camozzi personnel.

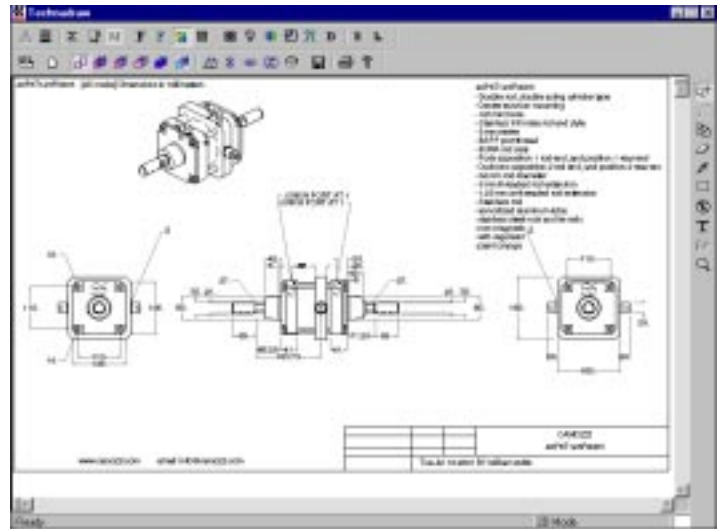

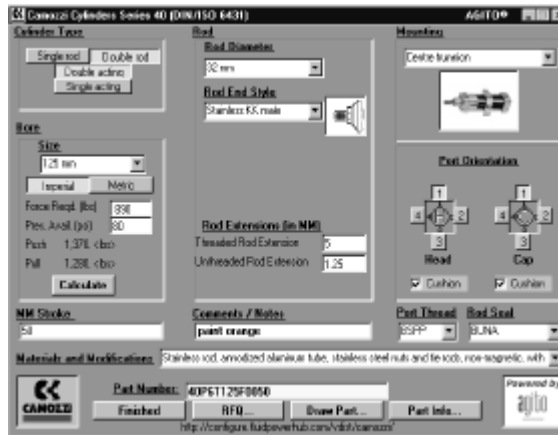

"CAD Drawing Files

2D, 3D and Solid Model CAD formats"

User control over full-screen product drawings. Turn on/off drawing views. Generate top, back and bottom product views. One click turns dimensions into product catalog reference variables. One click changes Imperial dimensions into Metric dimensions. Need a photo realistic product view with or without dimensions? One click will generate a Ray Traced photo-realistic product view. Control scale of the on-screen views. Add notes, change fonts, size and colors. A true CAD program. Not just a drawing viewer, puts the user in control of the information. Engineer designed and Engineer tested. The best on-line product configurator and CAD drawing generator to date.

Electronic, RFQ, automatically filed in, just "Click Send"

Dimensioned drawings in 2D, 3D and solid model views and CAD file formats.

The Virtual Distributor system and platform was created and developed by TechnASales. Known world-wide for their Fluid Power software programs. Established in 1987 TechnASales has lead the development curve for on-line, GUI, rules based product configurators. These linked to the powerful TechnADRAW, CAD module, provide fast, real-time dimensioned product drawings and CAD files.
